WALT: Identify instruction features

How to Make a sword instructions

- ▶ Today we are going to read through the instructions about how to make a Viking sword and label the features of instructions
- ▶ Read through the features and make sure you are familiar with them, then read through the instruction text, then label the features identifying where they are in the text

Instruction Features to find in the text

Title	Bullet points	You will need/equipment/ingredients	Imperative verbs
Numbers	Helpful hint/top tip	Underlined sub-headings	Subordinating conjunctions
Method:clear steps in sequence	Text boxes	Diagrams/photos to show steps	Adverbs to emphasise details

HOW TO MAKE A CARDBOARD SWORD

Have you ever seen a picture of a Viking in battle? They are rarely without their famous swords. Today you will make a Viking sword of your own. Follow this simple guide to making a Viking-style sword out of cardboard and foil.

YOU WILL NEED:

- Strong cardboard
- Kitchen foil
- Sticky tape
- Pen / pencil
- Ruler
- Small mug to draw around
- Scissors or a craft knife

METHOD

1. DRAW OUT THE SHAPE OF YOUR SWORD

Use the picture as a guide for this.

Draw three straight parallel lines 45cm long and 3cm apart, leaving extra space at one end

of the cardboard. This will form the two sides of your blade and the place where you hold your sword, which is called the hilt.

You'll need to make one end of your blade pointy. Draw identical triangles on each side, making sure that the point is half way.

At the other end, the hilt of your sword ends in a rounded pommel. To draw this, put your mug over the hilt-end of one side of the blade and draw half way around it.

2. CUT OUT YOUR SWORD

First cut out the shape of your sword. Then, using a ruler as a guide, score down the middle line with some scissors. Fold the two sides of your blade onto each other and tape them together secure.

3. WRAP YOUR BLADE WITH FOIL

Take a piece of kitchen foil the same length as your blade and stick it to the middle of one side of your blade. Carefully wrap/fold the foil around the blade and stick in place. At the 'sharp end' fold the corners down as if you're starting to wrap a present and glue/tape in place.

4. MAKE YOUR HILT

5. MAKE YOUR CROSS GUARD

To make the cross guard which protects your hand, draw a rectangle on your cardboard 6cm wide and 10cm long. You'll need a slot out of the middle that is the

Top Tip

To find the middle of your cross guard, draw straight lines between each corner and half way across each side then measure out your rectangles.

same side as your blade. It

The place that you hold your sword is called the hilt. Draw a straight line up your cardboard loo roll and smooth it out flat. Tape it to theommel-end of your sword.

Fold the loo roll around the blade until you can't fold it anymore, then tape it together with masking tape across the long side.

will be about 3cm x 1.5cm, depending on how thick your cardboard is.

6. PUT IT ALL TOGETHER

You're almost ready for battle! Slide the cross guard piece down the blade (pencil side down) and tape it to the hilt underneath.

Fun Fact

The tradition of naming swords started in pre-history, and continued into the Middle Ages.

7. NAME YOUR WEAPON

If you are working from home, you could print out the instructions and highlight/underline and draw arrows labelling the fetures.

If you don't have a printer, you can write out the instruction feature and then use a hyphen (-) and write the part of the instructions you found it.
